

25th Subject Library at the Faculty: The Library of Theoretical and Computational Linguistics

The reference library of the Department of Theoretical and Computational Linguistics has been transformed into a subject library and has thus become the 25th library in the network of FA libraries. Thanks to this arrangement, the library is now accessible not only to members of the Department, but to all readers.

The collection consists of more than 1,100 volumes mostly in English and contains both introductory and specialized literature dealing with various aspects of formal and theoretical linguistics.

The library is now open to readers every Monday and Friday from 10:00 to 12:00 in Celetná 13, room 21. Other opening times can be negotiated by e-mail.
