

Combining verbs in and across languages

Prague
Descriptive
Linguistics

Zveme vás na workshop skupiny Pražské deskriptivní lingvistiky
pátek 26. října 2018 • místnost č. 104 hlavní budova FF UK

Abstract

This workshop is bringing together researchers who deal with **multiverb constructions** in different languages of the world. The common goal is to shed light on certain entrenched concepts such as **serial verb constructions**, **auxiliaries** or **light verbs**, and discuss to what extent they are useful as adequate **descriptive categories** for the grammars of individual languages on the one hand, and as meaningful typological **comparative concepts** on the other. Do they exhaustively and appropriately account for the cross-linguistic variability? Or should a more efficient set of categories be proposed?

Among the crucial issues to be raised is the nature of the proposed categories: are they not better perceived as scalar than discrete? What is the synchronic relationship between the categories, i.e. how to deal with verbs which can appear in different roles? What is the diachronic relationship between them?

We will discuss in detail the following issues:

- An exercise in matching form and function: what “periphrastic verbs” *can* do that auxiliaries, light verb constructions, constructional auxiliaries and serial verb constructions cannot (or vice versa)? (cross-linguistic comparison)
- The morphosyntactic status of multiverb constructions – is there a head? Are the verbs overtly linked? (Arabic)
- Where is the border between mono- and multi-clausality in multiverb combinations in a language where overt morphosyntactic marking is either facultative or outright impossible? (Thai)
- Does the distinction between auxiliaries and light verbs make sense? (Japanese and other Central and East Asian languages)
- How much does the original semantics of auxiliary verbs define their grammaticalized use in Sakha? Are they semantically bleached (light verbs) or is the grammatical function only an extension of their meanings? (Sakha)
- Is it possible to pose discrete boundaries between auxiliaries, light verbs, and lexical verbs? (Manchu and Mongolian)
- Ad Jespersen: Auxiliaries and serialisation encode conceptual categories that are routinely determined in a given language. How long-lived or stable are such conceptual categories, and how short-lived their grammatical expressions? (Papuan)

Pátek 26. 10. 2018 • 10.20–18.30

Combining verbs in and across languages

Prague
Descriptive
Linguistics

Zveme vás na workshop skupiny Pražské deskriptivní lingvistiky
pátek **26. října** 2018 • místnost č. **104 hlavní budova** FF UK

Program

- 10:20** *Introduction*
- 10:30** – 11:00 Multiverb combinations in Thai revisited
Jan Židek
- 11:00** – 12:00 Complex predicates in Abui and Sawila (Papuan)
František Kratochvíl
Lunch
- 13:00** – 13:30 Semantics of auxiliary verbs in Sakha
Jonáš Vlasák
- 13:30** – 14:30 When a verb meets another verb – on verb chains from a cross-linguistic
perspective
Florian Siegl
Coffee break
- 15:00** – 15:30 Multiverb constructions in Arabic: Is there a head? Are the verbs linked?
Adam Pospíšil
- 15:30** – 16:00 On light verbs with a heavy heart: Multiverb construction categorization
issues in Japanese
Vít Ulman
- 16:00** – 16:30 The verbal expression of aspectual and phasal semantics in Nanai
Sonya Oskolskaya
Coffee break
- 17:00** – 17:30 Kazakh complex predicates: Functional projections above VP
Eszter Ótött Kovács
- 17:30** – 18:30 Categorization problems of multiverb constructions in Manchu and
Mongolian
Veronika Zikmundová, Veronika Kapišovská & Jan Křivan

Pátek 26. 10. 2018 • **10.20–18.30**

Srdečně zveme všechny zájemce. Vstup na celý program je volný, předchozí přihlášení není nutné.
